

Special Issue on Geography and Environment

Call for Papers

Geography is the study of places, landscapes and human-environment interactions. Geographers address important questions concerning environmental change, economic development, globalization, human population growth, migration, land-use change, and geopolitics. Geographers also develop sophisticated technological tools to examine Earth's diverse landscapes and environments. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of geography and environment.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **geography and environment**. In this special issue, potential topics include, but are not limited to:

- Human systems analysis
- Geographical technologies and techniques
- Regional analysis
- Landscape analysis
- Human and nature
- Natural resources

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Geography and Environment**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	October 20th, 2016
Publication Date	December 2016

Guest Editor:

Prof. Valentine Udoh James, Fluorotronics Inc., USA
