

Special Issue on Environment Geographical and Resources Planning and Management

Call for Papers

Resource management is the process by which businesses manage their various resources effectively. Those resources can be intangible – people and time – and tangible – equipment, materials, and finances. It involves planning so that the right resources are assigned to the right tasks. Managing resources involves schedules and budgets for people, projects, equipment, and supplies. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **environment geographical and resources planning and management**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **environment geographical and resources planning and management**. In this special issue, potential topics include, but are not limited to:

- Mineral energy resources
- Land resources
- The water resources
- The forest resources
- Marine resources
- Renewable resources
- Environment resources

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - environment geographical and resources planning and Management**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	December 19th, 2017
Publication Date	February 2018
