

Special Issue on Environmental Protection

Call for Papers

Environmental Protection includes programs that are aimed at reducing risks to the environment from contaminants such as hazardous materials and wastes, fuels, and oils. These programs address pollution prevention measures and regulatory compliance by providing procedures for safely working with these materials, inspecting the storage vessels and locations, and designating preventative maintenance procedures. Also included are environmental emergency plans, which provide the appropriate actions to be taken in the event of a spill or release. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **environmental protection**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **environmental protection**. In this special issue, potential topics include, but are not limited to:

- Causes of environmental degradation
- Effects of environmental degradation
- Ecological environment protection
- Wildlife conservation
- Land conservation
- Environmental conservation and protection
- Future challenges to environmental sustainability

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Environmental Protection**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	September 18th, 2020
Publication Date	November 2020
