

Special Issue on Waste Treatment, Recovery and Management

Call for Papers

Waste treatment is essential for controlling environmental pollutants, even those with the least impact on the environment. There are a number of wastes, including agricultural waste, industrial waste, domestic waste, radioactive waste, and so on. All countries have different laws and regulations to treat these wastes. Sewage presents a major environmental issue and should be properly treated and disposed of in order to control the spread of hazardous chemicals. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **waste treatment, recovery and management**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **waste treatment, recovery and management**. In this special issue, potential topics include, but are not limited to:

- Agricultural waste water treatment
- Industrial wastewater treatment
- Sewage treatment
- Radioactive waste treatment
- Solid waste treatment
- Waste treatment and disposal methods
- Waste management system

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Waste Treatment, Recovery and Management**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	October 29th, 2020
Publication Date	December 2020

Guest Editor:

Scientific Research
Open Access

**Journal of Geoscience and
Environment Protection**
ISSN Online: 2327- 4344
