

Special Issue on Environmental Quality

Call for Papers

Environmental quality is a set of properties and characteristics of the environment, either generalized or local, as they impinge on human beings and other organisms. It is a measure of the condition of an environment relative to the requirements of one or more species and or to any human need or purpose. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **environmental quality**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **environmental quality**. In this special issue, potential topics include, but are not limited to:

- Environmental policy: protection and regulation
- Air as an environmental quality
- Effects of deteriorating air quality
- Environmental pollutants
- Water as an environmental quality
- Effects of water pollution
- Land as an environmental quality
- Health impact of environmental quality
- Environmental quality prediction
- Environmental quality monitoring

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Environmental Quality**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	February 12th, 2021
Publication Date	April 2021
