## Special Issue on Environmental Management Information Systems

### Call for Papers

Environmental Information Systems are the core of contemporary urban environment management systems, and a prerequisite for the proper, timely information of the public. Technological advances require systems that can make optimum use of informatics and telecommunications infrastructures to address environmental management needs, yet which are open, flexible, modular and inexpensive to implement and operate. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Environmental Management Information Systems**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Environmental Management Information Systems**. In this special issue, potential topics include, but are not limited to:

- Environmental Information Management database
- Environmental monitoring
- Mapping and environment
- Composition of the environmental management information system
- Statistical classification, data fusion
- Knowledge based systems, GIS, spatial databases
- Environmental information systems strategy
- Environmental management and information systems

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Environmental Management Information Systems**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	January 28th, 2022
Publication Date	March 2022

**Scientific Research**  
*Open Access*

**Journal of Geoscience and  
Environment Protection**  
ISSN Online: 2327- 4344
