Special Issue on

Artificial Intelligence and Environmental Research

Call for Papers

Artificial Intelligence and Environmental Research is an interdisciplinary field that focuses on using artificial intelligence (AI) techniques to tackle environmental challenges and study the impact of human activities on the environment. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Artificial Intelligence and Environmental Research**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Artificial Intelligence and Environmental Research.** In this special issue, potential topics include, but are not limited to:

- Environmental Monitoring Systems
- Climate Change Impact Analysis
- Sustainable Resource Management
- Pollution Control and Remediation
- Wildlife Conservation and Biodiversity Preservation
- Smart Environmental Planning
- Ecological Modeling and Simulation
- Climate Adaptation Strategies
- Environmental Policy and Decision Support

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue -** *Artificial Intelligence and Environmental Research*" should be chosen during your submission.

According to the following timetable:

Submission Deadline	May 24th, 2024
Publication Date	July 2024
