

Special Issue on Complication in Medicine

Call for Papers

Complications, in medicine, are unexpected events which occur in the course of diagnosis, management, or treatment of disease. As a general rule, complications are not viewed favorably, as they can not only make treatment much more difficult but also threaten the patient's life, depending on the nature of the complications. In patients at risk of complications, careful monitoring is often used to detect signs at the early stages. As one of the most catastrophic injuries to human, **medical complications research** is of great attractions to researchers.

In this special issue, we are going to invite front-line researchers and authors to submit original research and review articles that explore **complications in medicine**. Potential topics include, but are not limited to:

- Occurrence of medical complications in the course of treatment for a disease
- Diseases associated with a risk of complications
- Assessment of the potential risk of complications
- Treatment of medical complications
- Prevention of medical complications
- Cases about medical complications

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - *Complication in Medicine***” should be chosen during your submission.

According to the following timetable:

| | |
|---------------------|------------------|
| Submission Deadline | August 5th, 2014 |
| Publication Date | October 2014 |
