

Special Issue on Diabetes Mellitus

Call for Papers

Diabetes Mellitus is a disorder in which blood sugar (glucose) levels are abnormally high because the body does not produce enough insulin to meet its needs. If left untreated, diabetes can cause many complications. Acute complications include diabetic ketoacidosis and nonketotic hyperosmolar coma. Serious long-term complications include cardiovascular disease, stroke, chronic kidney failure, foot ulcers, and damage to the eyes.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **diabetes mellitus**. Potential topics include, but are not limited to:

- Type 1 diabetes and type 2 diabetes
- Gestational diabetes
- Other forms of diabetes
- Diagnosis, treatment and management
- Pathophysiology, complications and metabolic syndrome
- Epidemiology

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Diabetes Mellitus**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	August 28th, 2015
Publication Date	October 2015
