

## Special Issue on Children's Health

### Call for Papers

**Children's Health** includes children's illnesses and disorders, as well as the prevention and treatment of mediated diseases in children and infants. Children receive proportionately larger doses of environmental toxicants than adults, and the fact that their organs and tissues are rapidly developing makes them particularly susceptible to chemical insults. It is about the research and treatment of numerous health issues concerning children including autism, asthma, epilepsy, and oral health to name a few. The goal of this Special Issue is to provide a platform for scientists worldwide to promote, share, and discuss various new issues and developments in the area of **Children's Health**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Children's Health**. Potential topics include, but are not limited to:

- Accident Injury
- Child Psychological and Behavioral Development
- Children's Allergology
- Children's Infectious Diseases
- Children's Intensive Care
- Children's Neurology
- Children's Nutrition and Growth
- Diseases Prevention and Treatment on Children
- Physical Development
- Sensory Disorders

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the "**Special Issue**" under your manuscript title. The research field "**Special Issue - Children's Health**" should be selected during your submission.

Special Issue timetable:

Submission Deadline	September 28th, 2015
Publication Date	November 2015

**Guest Editor:**
