

Special Issue on Asthma and Related Disorders

Call for Papers

Asthma is a chronic disease that can affect people of all ages, but it most often starts during childhood. Common symptoms include wheezing, coughing, chest tightness, and shortness of breath. Asthma is thought to be caused by a combination of genetic and environmental factors. There is no cure for asthma, but the symptoms can be controlled with proper treatment.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Asthma and Related Disorders**. Potential topics include, but are not limited to:

- Asthma attack
- Acute severe asthma
- Brittle asthma
- Occupational asthma
- Aspirin-induced asthma
- Exercise-induced asthma
- Steroid-resistant asthma
- Inhaled corticosteroids
- Beclomethasone
- Nebulizer

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Asthma and Related Disorders**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	March 1st, 2016
Publication Date	May 2016
