

Special Issue on Body Temperature

Call for Papers

Temperature is an indicator of the amount of heat contained in a system and in the human body our temperature is an extension of basic body metabolism and a host of other factors. Human beings are homeothermic animal, therefore, we can maintain a stable internal body temperature regardless of external influence.

In this special issue, we intend to invite eminent researchers involved in **body temperature** and related areas of research to submit original researches and review articles highlighting advancements in the field with focus on the obstacles that remain unresolved.

Potential topics include, but not limited to:

- Body temperature, fever, hypothermia
- Hyperthermia treatment
- Core temperature
- Basal body temperature, birth control and reproduction
- Enzymes effectiveness and particular temperature

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Body Temperature**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	March 25th, 2016
Publication Date	May 2016

Guest Editor:

Dr. Mayumi WATANABE
Niigata University, Japan
