

Special Issue on Hepatitis and Related Disorders

Call for Papers

The liver is the largest organ inside our body, which helps the body digest food, store energy, and remove poisons. If the liver doesn't work properly, it can cause serious illness or even death. Hepatitis is an inflammation of the liver, which may be caused by viral infections, chemicals, alcohol, drug use and other factors.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Hepatitis and Related Disorders**. Potential topics include, but are not limited to:

- Acute hepatitis
- Chronic hepatitis
- Alcoholic hepatitis
- Toxic and drug-induced hepatitis
- Ischemic hepatitis
- Giant cell hepatitis
- Autoimmune hepatitis
- Steatohepatitis
- Hepatitis A, B, C, D, E

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Hepatitis and Related Disorders**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	April 29th, 2016
Publication Date	June 2016
