

Special Issue on Health Sciences Informatics

Call for Papers

Health Sciences Informatics is an academic topic that studies the intersection of healthcare and information technology. It focuses on the development, implementation, and evaluation of informatics systems and solutions to improve patient care, health outcomes, and the efficiency of healthcare delivery. This field explores the use of data, information, and knowledge to drive innovations in health science and healthcare practice, enabling more informed decision-making and enhanced patient safety.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Health Sciences Informatics**. Potential topics include, but are not limited to:

- Clinical informatics
- Computer-aided diagnosis
- Computational disease modeling
- Nursing informatics
- Smart health monitoring
- Public health informatics
- Bioinformatics
- Telemedicine informatics
- Health information management
- Medical big data and artificial intelligence
- Healthcare decision-support systems

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Health Sciences Informatics**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	August 7th, 2024
Publication Date	October 2024

Scientific Research
Open Access

Health
ISSN Online: 1949-5005
