

Special Issue on Heterocyclic Chemistry Research

Call for Papers

The extraordinary amount of attention paid to heterocyclic compounds is due to their very high rate of occurrence in nature as well as their crucial role in drug design and the development of functional materials. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Heterocyclic Chemistry Research**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Heterocyclic Chemistry Research**. In this special issue, potential topics include, but are not limited to:

- Heterocyclic compounds (Pyrrole, Imidazole, Pyrazine, Indoles, etc.)
- Structure, properties and characterization
- Images of rings with one heteroatom
- Synthetic methods
- Reactions
- Larger ring heterocycles
- Applications of heterocyclic compounds

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Heterocyclic Chemistry Research**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	June 9th, 2024
Publication Date	August 2024
