

## Special Issue on Quantum Mathematics and Its Applications

### Call for Papers

Quantum mathematics turns out to be a powerful tool to solve deep outstanding mathematical problems. Similarly, new mathematical ideas address some of the most fundamental questions in physics, such as the Big Bang, black holes, and the ultimate fate of space, time, and matter. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **quantum mathematics and its applications**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **quantum mathematics and its applications**. In this special issue, potential topics include, but are not limited to:

- Evolution of quantum physics
- Mathematical methods in quantum theory
- General quantum equation
- Postulates of quantum mechanics
- Schrodinger wave equation
- Hilbert space

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Quantum Mathematics and Its Applications**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	November 30th, 2021
Publication Date	January 2022
