

Special Issue on Computers and Mathematics with Applications

Call for Papers

Computer-Oriented Mathematical Physics describes some mathematical models of classical physical phenomena, particularly the mechanics of particles. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Computers and Mathematics with Applications**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Computers and Mathematics with Applications**. In this special issue, potential topics include, but are not limited to:

- The development of theories and methods for computer and information sciences
- Theoretical informatics and discrete mathematics
- Cryptography, algorithmics, symbolic calculus
- Non-standard numeration systems
- Graphs and Networks
- Design, implementation, and analysis of algorithms
- Formal logic notation, proof methods

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue –Computers and Mathematics with Applications**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	November 28th, 2023
Publication Date	January 2024
