

## Special Issue on Space Geometry and Its Applications

### Call for Papers

Space Geometry and Its Applications is a research field that focuses on the study of geometric structures and their applications in space. It encompasses various sub-research areas that utilize geometric principles and concepts to analyze and understand spatial phenomena. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Space Geometry and Its Applications**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Space Geometry and Its Applications**. In this special issue, potential topics include, but are not limited to:

- Vectors and the geometry of space
- Shape and space in geometry
- Euclidean space
- Equations of lines and planes
- Cylinders and quadric surfaces
- Cylindrical and spherical coordinates

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Space Geometry and Its Applications**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	January 24th, 2024
Publication Date	March 2024
