

Special Issue on Emotion, Cognition, and Behavior

Call for Papers

Emotion, behavior and cognition are interdependent, each exerting a powerful influence on the others. Emotion is central to the quality and range of everyday human experience. An emerging theme is the question of how emotion interacts with and influences other domains of cognition, in particular attention, memory, and reasoning. The psychological consequences and mechanisms underlying the emotional modulation of cognition are also key points.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **emotion, cognition, and behavior**. Potential topics include, but are not limited to:

- Functional theory
- Cognitive processes and development
- Emotion-cognition interactions
- Cognitive-behavioral research
- Psychophysiology
- Cognitive therapy
- Behavioral therapy

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Emotion, Cognition, and Behavior**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	November 18th, 2015
Publication Date	January 2016
