

Special Issue on Learning and Behavior

Call for Papers

This special issue aims to bring together scholars working on both basic and applied aspects of learned and instinctive behavior. Areas of interest include: classical and operant conditioning, reinforcement schedules, avoidance and punishment, stimulus control, comparative cognition, observational learning, motor skill learning, and choice. Both the classic studies and the most recent developments and trends in the field are explored.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Learning and Behavior**. Potential topics include, but are not limited to:

- Early learning theories
- Effects stimuli have on learning and behavior
- Social learning
- Motivation
- Cognitive developmental theory
- Memory and human information processing models
- Problem-solving methods

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Learning and Behavior**” should be selected during your submission.

Special Issue Timetable:
