

## Special Issue on Parasitology

### Call for Papers

Parasitology is the study of parasites, their hosts, and the relationship between them. A parasite is a pathogen that simultaneously injures and derives sustenance from its host. Some parasites are actually commensals, in that they neither benefit nor harm their host (for example, *Entamoeba coli*). The diseases caused by parasites range from relatively innocuous to fatal.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Parasitology**. Potential topics include, but are not limited to:

- Falciparum
- Hosts
- Human parasites
- *Necator americanus*
- Nematode
- Parasites in farm animals
- Parasitic diseases
- Parasitic infections
- Plasmodium
- Schistosomiasis
- Toxoplasma

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Parasitology**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	June 26th, 2018
Publication Date	August 2018

**Guest Editor:**

**Scientific Research**  
*Open Access*

**Journal of Biosciences  
and Medicines**

**ISSN Online: 2327-509X**
