

## Special Issue on Preventive Medicine and Public Health

### Call for Papers

Preventive medicine focuses on the practice of medicine in the health of individuals, communities and specific populations. The goal of preventive medicine is to protect, promote and maintain health and well-being and to prevent disease, disability and death. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Preventive Medicine and Public Health**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Preventive Medicine and Public Health**. Potential topics include, but are not limited to:

- Cancer screening
- Disease prevention and control
- Epidemiological and statistical methods
- Environmental and occupational health
- Nutrition and food hygiene
- Maternal and child health
- Health policy and management
- Health and social behavior
- Clinical and preventive measures
- Planning and evaluation of health services

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue -Preventive Medicine and Public Health**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	March 2nd, 2021
Publication Date	May 2021
