
Special Issue on Pregnancy and Child Birth

Call for Papers

Pregnancy is the process by which the embryo and fetus grow and develop in the mother's body. It sometimes involves multiple children, such as twins. Childbirth, which means the end of pregnancy, is when one or more babies leave the uterus through vagina or caesarean section. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Pregnancy and Child Birth**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Pregnancy and Child Birth**. Potential topics include, but are not limited to:

- Diagnosis of pregnancy
- Pediatric care
- Infant care and infant health
- Reproductive health care
- Fetal complications
- Signs and symptoms of pregnancy
- Preterm
- Developmental disabilities
- Newborns with cyanosis
- Pediatric blood and cancer
- Maternal health
- New-born screening

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Pregnancy and Child Birth**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	August 21st, 2021
Publication Date	October 2021
