

Special Issue on Bioconversion and Biocatalysis Technology

Call for Papers

Bioconversion and biocatalysis technology is on the verge of significant growth for alternative and renewable resources from biomass and waste organic materials. The advanced nanotechnology and biotechnology have significantly improved the advancement of the bioconversion and biocatalysis technologies for the biomaterials and nanomaterials synthesis from renewable sources and waste materials.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **bioconversion and biocatalysis technology**. Potential topics include, but are not limited to:

- Bioconversion technology
- Biocatalysis technology
- Renewable energy
- Biomaterials
- Design and optimization of bioconversion process
- Bioreactor systems
- Applications

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Bioconversion and Biocatalysis Technology**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	December 8th, 2016
Publication Date	January 2017

Guest Editor:

Dr. Bouzid Menaa

Fluorotronics, Inc., USA
