

Special issue on Dementia Research

Call for Papers

Dementia can affect someone's memory, reduces the ability to learn, reason, retain or recall past experience and loss of patterns of thoughts, feelings and activities. Dementia divides into reversible and irreversible. But only about 10% is reversible. Some common forms of dementia are Alzheimer's disease, vascular dementia, frontotemporal dementia, semantic dementia and dementia with Lewy bodies. Of these, Alzheimer's disease is the most common.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Dementia Research**.

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission, Prospective authors should submit an electronic copy of their complete manuscript through the journal [Paper Submission System](#).

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue- Dementia Research**" should be chosen during your submission.

According to the following timetable:

Manuscript Due	April 25th, 2013
Publication Date	June 2013

Guest Editor

Dr. Ernesto Goldman

Ohio State University Wexner Medical Center, USA
