

## **Special Issue on Research on Biomechanics**

## **Call for Papers**

**Biomechanics** is the study of the structure and function of biological systems such as humans, animals, plants, organs, and cells by means of the methods of mechanics.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **biomechanics**. Potential topics include, but are not limited to:

- Soft body dynamics
- Kinesiology (kinetics + physiology)
- Animal locomotion & Gait analysis
- Musculoskeletal & orthopedic biomechanics
- Cardiovascular biomechanics
- Human factors engineering & occupational biomechanics
- Implant (medicine), Orthotics & Prosthesis
- Injury biomechanics, sports biomechanics and rehabilitation

Authors should read over the journal's <u>Authors' Guidelines</u> carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at <u>Paper Submission System</u>.

Please kindly specify the "**Special Issue**" under your manuscript title. The research field "**Special Issue** – *Research on Biomechanics*" should be selected during your submission.

Special Issue timetable:

Submission Deadline	July 30th, 2015
Publication Date	September 2015
