

Special Issue on Transient Receptor Potential Channels

Call for Papers

Transient Receptor Potential Channels (TRP channels) are a group of ion channels located mostly on the plasma membrane of numerous animal cell types. There are about 28 TRP channels that share some structural similarity to each other.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **transient receptor potential channels**. Potential topics include, but are not limited to:

- Sub-families
- Ion channel
- Structure and function
- Cellular regulation
- Signal transduction
- Clinical significance
- Development

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Transient Receptor Potential Channels**” should be selected during your submission.

Special Issue timetable:

| | |
|---------------------|-------------------|
| Submission Deadline | August 24th, 2016 |
| Publication Date | October 2016 |
