

Special Issue on Smart Home, Office and City

Call for Papers

Smart home, office and city is a broad term that can apply to many technologically high tech systems. We think of it as easy, universal, all purpose home control that makes life simpler, safer, more fun and saves energy; all at the same time. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in area of Smart Home, Office and City.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Smart Home, Office and City**. Potential topics include, but are not limited to:

- Smart homes, e-health and energy efficiency
- RFID and body sensors
- Intelligent sensors
- Embedded computing systems
- Cloud computing in smart home technology
- Smart building and city data management
- Participatory telehealth in smart city
- Ambient intelligence
- Human-device interface
- Ubiquitous and pervasive computing concerns
- Smart management of home, office and city appliances
- Smart emergency care for seniors
- Smart wheelchairs and personal robotics
- Context awareness and autonomous computing
- Residential networks and services
- Mobile services
- Health technology assessment and analysis
- Innovative smart home applications and services
- Smart environment monitoring and control

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - *Smart Home, Office and City***” should be selected during your submission.
