

Special Issue on Computer Programming Language

Call for Papers

With the rapid development of computer technology, computer programming language is also in constant development. Computer programming language mainly includes high-level language, machine language and assembly language three forms. Computer programming languages will be developed in a more convenient and efficient way in the future. The main purpose of this special issue is to explore the development and application of computer programming language.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **computer programming language**. Potential topics include, but are not limited to:

- Assembly language
- Machine language
- Scripting Language
- High-level programming language
- Language design and implementation
- Program generation and transformation
- New programming concepts and paradigms
- Application of programming languages
- C/C++, C#, Java, BASIC , LabVIEW, VB, Python, XML, OpenCL, etc.

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Computer Programming Language**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	January 25th, 2018
Publication Date	March 2018
