Special Issue on Information Technology and Applications

Call for Papers

Information technology is the general term of various technologies used mainly for the management and processing of information. It includes sensing technology, computer and intelligent technology, communication technology and control technology. The application of information technology includes computer hardware and software, network and communication technology, application software development tools, etc. Since the popularization of computers and the Internet, people have increasingly used computers to produce, process, exchange and disseminate various forms of information.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **information technology and its application**. Potential topics include, but are not limited to:

- Informatization and information industry
- Information and communication technology (ICT)
- Programming language
- Data processing
- Data mining and information retrieval
- Computing and information technology
- Information technology and network security
- Applications

Authors should read over the journal's <u>For Authors</u> carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's <u>Paper Submission System</u>.

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue** – *Information Technology and Its Application*" should be chosen during your submission.

According to the following timetable:

Submission Deadline	November 20th, 2019
Publication Date	January 2020
