

Special Issue on Digital Communications and Networking

Call for Papers

Digital Communications is the transfer of data over a point-to-point or point-to-multipoint communication channel. Basic principles of data transmission include computer networking, computer communication applications and networking protocols.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on Digital Communications and Networking. Potential topics include, but are not limited to:

- Digital signal processing
- Data compression
- Signal multiplexing
- Optical communications
- Ad Hoc networks
- Network and data security
- Internet of Things
- Communication protocols
- Coding and information theory
- Mobile communication systems
- Digital telecommunication applications

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Digital Communications and Networking**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	March 12th, 2020
Publication Date	May 2020

For publishing inquiries, please feel free to contact the Editorial Assistant at submission.entrance1@scirp.org
