## Special Issue on Information Technology and Applications

### Call for Papers

Information technology (IT) is the application of computers to store, study, retrieve, transmit and manipulate data, or information, often in the context of a business or other enterprise. Several industries are associated with information technology, including computer hardware, software, electronics, semiconductors, internet, telecom equipment, and e-commerce.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Information Technology and Applications**. Potential topics include, but are not limited to:

- Information processing and distribution
- Data structures and algorithms
- Information technology and computing
- Information science & engineering
- Data retrieval and transmission
- Information systems and management
- IT & infrastructure
- Information security
- Process improvement
- Information and big data processing
- Applications in health, engineering and business

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Information Technology and Applications**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	February 28th, 2021
Publication Date	April 2021
