
Special Issue on Information Technology and Applications

Call for Papers

Information technology (IT) is the application of computers to store, study, retrieve, transmit and manipulate data, or information, often in the context of a business or other enterprise. Several industries are associated with information technology, including computer hardware, software, electronics, semiconductors, internet, telecom equipment, and e-commerce.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Information Technology and Applications**. Potential topics include, but are not limited to:

- Computer vision and image processing
- Virtual and augmented reality
- Intelligent and decision support systems
- Integrated information technology
- Cloud computing and virtualization
- Machine learning and artificial intelligence
- Human-computer interaction
- Biometrics
- Data and informatics
- Health IT
- IoT
- Complex systems in IT
- Computational science in IT
- Data management systems
- Data science & analytics strategy
- Information and knowledge management
- Business infrastructure
- Computer integrated manufacturing
- Modeling, simulation, information technology
- IT security

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – *Information Technology and Applications***” should be chosen during your submission.

According to the following timetable:

Submission Deadline	March 17th, 2023
Publication Date	May 2023

For publishing inquiries, please feel free to contact the Editorial Assistant at submission.entrance1@scirp.org
