## Special Issue on Applications of ChatGPT

### Call for Papers

"Applications of ChatGPT" refers to the academic exploration of using ChatGPT, a language model developed by OpenAI, in various real-world scenarios. ChatGPT is designed to engage in conversational interactions and provides human-like responses. The academic research on its applications explores how ChatGPT can be utilized to enhance customer service, provide virtual assistance, facilitate language learning, offer personalized recommendations, simulate characters in gaming, and aid in various other tasks that require conversational AI capabilities.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Applications of ChatGPT**. Potential topics include, but are not limited to:

- Customer service and support
- Virtual assistance and chatbots
- Language learning and tutoring
- Personalized recommendation systems
- Gaming and character simulation
- Mental health support and therapy
- Information retrieval and question answering
- Content creation and writing assistance
- Conversational agents in healthcare
- Multilingual communication and translation
- Social media moderation and content filtering
- Educational applications and tutoring
- Accessibility and inclusive technology

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue – Applications of ChatGPT**" should be chosen during your submission.

According to the following timetable:
