

Special issue on Lymphoma Research

Call for Papers

Lymphoma is a cancer of the lymphocytes, a type of cell that forms part of the immune system. Typically, lymphoma is present as a solid tumor of lymphoid cells. Treatment might involve chemotherapy and in some cases radiotherapy and/or bone marrow transplantation, and can be curable depending on the histology, type, and stage of the disease. These malignant cells often originate in lymph nodes, presenting as an enlargement of the node (a tumor). It can also affect other organs in which case it is referred to as extranodal lymphoma. Extranodal sites include the skin, brain, bowels and bone.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Lymphoma**.

Authors should read over the journal's [Author Guidelines](#) carefully before submission, Prospective authors should submit an electronic copy of their complete manuscript through the journal [Paper Submission System](#).

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special issue-Lymphoma Research**" should be chosen during your submission.

According to the following timetable:

Manuscript Due	January 22th, 2012
Publication Date	March 2013

Editors-in-Chief

Prof. Siby P. Saha

University of Kentucky, USA
