

## Special issue on Ovarian, cervical and Endometrial Cancer

### Call for Papers

Uterine cancer is the most common cancer of a woman's reproductive system. Uterine cancer begins when normal cells in the uterus change and grow uncontrollably, forming a mass called a tumor. A tumor can be benign (non-cancerous) or malignant (cancerous, meaning it can spread to other parts of the body). Noncancerous conditions of the uterus include fibroids (benign tumors in the muscle of the uterus), endometriosis (endometrial tissue on the outside of the uterus or other organs), and endometrial hyperplasia (an increased number of cells in the uterine lining).

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Ovarian, cervical and Endometrial Cancer**.

Authors should read over the journal's [Author Guidelines](#) carefully before submission, Prospective authors should submit an electronic copy of their complete manuscript through the journal [Paper Submission System](#).

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special issue- Ovarian, cervical and Endometrial Cancer**" should be chosen during your submission.

According to the following timetable:

Manuscript Due	February 27th, 2013
Publication Date	April 2013
