

## Advances in Colorectal Cancer

### Call for paper

Colorectal cancer, commonly known as colon cancer or bowel cancer, is a cancer from uncontrolled cell growth in the colon or rectum (parts of the large intestine), or in the appendix. Genetic analysis shows that colon and rectal tumours are essentially genetically the same cancer. Symptoms of colorectal cancer typically include rectal bleeding and anemia which are sometimes associated with weight loss and changes in bowel habits.

In this special issue, we are going to invite front-line researchers and authors to submit original research and review articles that explore **Colorectal cancer**. Potential topics include, but are not limited to:

- Biochemical basis of colorectal cancer
- Cellular research in colorectal cancer
- Colon cancer or bowel cancer
- Dietary components in colorectal cancer prevention
- Enhanced survival and quality of life for colorectal cancer patient
- Colorectal cancer surgery
- Colorectal cancer Chemotherapy

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission, Prospective authors should submit an electronic copy of their complete manuscript through the journal [Paper Submission System](#). According to the following timetable:

Manuscript Due	May 29th, 2013
Publication Date	July 2013

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "*Special issue- Colorectal Cancer*" should be chosen during your submission.
