

Special Issue on Recent Advances in Diagnosis and Management of Gynecologic Cancers

Call for Papers

Gynecologic Cancers mainly focuses on cancers that start in women's reproductive organs, including ovarian cancer, vaginal cancer, uterine cancer, cervical cancer, and vulvar cancer. These organs are located in the pelvis which is the area below the belly and in between the hip bones. All women are at risk for gynecologic cancers. When the cancers are found earlier, treatment is relatively more effective.

This special issue will publish manuscripts related to epidemiology, diagnosis, molecular & genetic aspects, management, surgical techniques, chemotherapy, targeted molecular therapies, and quality of life of the following women's cancers:

- Cervical cancers
- Cancer of the uterus
- Ovarian cancer
- Primary peritoneal cancer
- Cancer of the fallopian tube
- Vulval Cancer
- Vaginal cancer

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Recent Advances in Diagnosis and Management of Gynecologic Cancers**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	October 21st, 2015
Publication Date	December 2015

Guest Editor:

Dr. Samir A. Farghaly
Cornell University, USA

Scientific Research
Open Access

Journal of Cancer Therapy

ISSN Online: 2151-1942
