

Special Issue on Sarcoma

Call for Papers

Compared with carcinoma, the sarcoma is a relatively rare kind of cancer that develops from connective tissues (such as fat, blood vessels, nerves, bones, muscles, deep skin tissues, and cartilage). Bone and soft tissue sarcomas are the two main types of sarcoma. It is a rare cancer in adults, but rather prevalent in children.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Sarcoma**. Potential topics include, but are not limited to:

- Angiosarcoma
- Chondrosarcoma
- Fibrosarcoma
- Leiomyosarcoma
- Liposarcoma
- Osteosarcoma
- Rhabdomyosarcoma

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Sarcoma**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	April 29th, 2016
Publication Date	June 2016
