

Special Issue on
Complementary and Alternative Therapies for Cancer
Call for Papers

A complementary therapy is treatment that is used along with standard medical treatment. An alternative therapy is generally used instead of conventional medical treatment. They both are non-traditional methods of diagnosing, preventing, or treating cancer or its symptoms, and usually have not gone through rigorous testing and are not supported by evidence. Some types of therapy may not be completely safe and may even cause harmful side effects.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Complementary and Alternative Therapies for Cancer**. Potential topics include, but are not limited to:

- Acupuncture
- Amygdalin
- Brachytherapy
- Cyberknife
- Essiac therapy
- Herbal remedies
- Hyperbaric oxygen therapy
- Ketogenic diet
- Massage therapy
- Music therapy
- Photodynamic therapy
- Relaxation techniques

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Complementary and Alternative Therapies for Cancer**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	May 31st, 2016
Publication Date	July 2016
