

Special Issue on Liver Cancer Research

Call for Papers

Liver cancer is cancer that starts in the cells of the liver. Hepatocellular carcinoma (HCC) is the most common type of liver cancer. The main risk factors for hepatocellular carcinoma include alcoholism, hepatitis B, hepatitis C, aflatoxin, cirrhosis of the liver, nonalcoholic steatohepatitis, hemochromatosis and so on.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Liver Cancer**. Potential topics include, but are not limited to:

- Cirrhosis
- Autoimmune diseases of the liver
- Hemochromatosis
- Hepatitis B or C virus infection
- Liver biopsy
- Liver MRI
- Liver transplantation
- Transcatheter arterial chemoembolization
- Radiofrequency ablation

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Liver Cancer Research**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	October 5th, 2016
Publication Date	December 2016
