

## Special Issue on Leukemia & Lymphoma

### Call for Papers

Leukemia is cancer that usually starts in the bone marrow and results in excessive abnormal white blood cells. Symptoms may include swollen gland, pain in the bones or joints, fevers, night sweats, feeling weak or tired, frequent infections, bleeding and bruising problems. Lymphoma refers to a group of blood cell tumors that develop in the lymphatic system. The main symptom is usually enlargement of lymph nodes that does not go away as well as fever, drenching sweats, weight loss, itching, feeling tired, etc.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Leukemia & Lymphoma**. Potential topics include, but are not limited to:

- Antileukemic drugs
- Follicular lymphoma
- Hairy cell leukemia
- Hodgkin lymphomas
- Human T-lymphotropic virus
- Leukemia in children
- Lymph node biopsy
- Lymphadenopathy
- Lymphocytic lymphoma
- Myeloid leukemia
- Myelomonocytic leukemia
- Precursor lymphoid neoplasms

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Leukemia & Lymphoma**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	June 15th, 2017
Publication Date	August 2017
