

Special Issue on Skin Cancer

Call for Papers

Skin cancer is a common cancer that arises from the skin. It starts from cells that begin as normal skin cells and transform into those with the potential to reproduce in an out-of-control manner. To reduce the risk of skin cancer, we can limit exposure to ultraviolet radiation, avoid wart virus infections, check our skin for suspicious changes and so on.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Skin Cancer**. Potential topics include, but are not limited to:

- Basal-cell carcinoma
- Squamous-cell carcinoma
- Malignant melanoma
- Radiotherapy
- Skin biopsy
- Skin cancer screening
- Mohs micrographic surgery

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Skin Cancer**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	August 15th, 2017
Publication Date	October 2017
