

Special Issue on Cancer Treatments

Call for Papers

Cancer can be treated by surgery, chemotherapy, radiation therapy, hormonal therapy, targeted therapy and synthetic lethality. The choice of therapy depends upon the location and grade of the tumor and the stage of the disease, as well as the general state of the patient. A number of experimental cancer treatments are also under development.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **cancer treatments**. Potential topics include, but are not limited to:

- Surgery
- Radiation therapy
- Chemotherapy
- Targeted therapies
- Immunotherapy
- Hormonal therapy
- Angiogenesis inhibitors
- Synthetic lethality
- Symptom control and palliative care
- Experimental cancer treatment

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Cancer Treatments**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	May 29th, 2018
Publication Date	July 2018
