## **Special Issue on Advances in Environmental Remediation**

## **Call for Papers**

Environmental remediation deals with the problem of environment pollutants. The aims of environmental remediation is to remove the pollution or contaminants from environmental media, such as soil, groundwater, sediment, or surface water. It also protects human health and the environment or from a brownfield site intended for redevelopment. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Advances in environmental remediation.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Advances in environmental remediation**. In this special issue, potential topics include, but are not limited to:

- Remediation standards
- Soil remediation
- Remediation technologies
- Groundwater remediation
- Surfactant enhanced aquifer remediation
- Technology of soil remediation

Authors should read over the journal's <u>For Authors</u> carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's <u>Paper Submission System</u>.

Please kindly notice that the "Special Issue" under your manuscript title is supposed to be specified and the research field "Special Issue - Advances in Environmental Remediation" should be chosen during your submission.

According to the following timetable:

Submission Deadline	February 25th, 2016
Publication Date	April 2016

**Guest Editor:** 

Prof. Shuguang Deng
