

Special Issue on The Effects of Environmental Changes on Land Use and Land Cover

Call for Papers

Land Use regulations, transportation infrastructure investments, storm and waste water management, and building standards are some of the traditional tools used to shape the development of human habitats. Land use practices vary considerably across the world. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of effects of environmental changes on land use and land cover.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **effects of environmental changes on land use and land cover**. In this special issue, potential topics include, but are not limited to:

- Land use planning
- Land cover
- Land use change
- Habitat destruction
- Agricultural land use
- Industrial land
- Land evaluation

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Effects of Environmental Changes on Land Use and Land Cover**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	November 29th, 2016
Publication Date	January 2017

Guest Editor:

Prof. Shuguang Deng
