

## Special Issue on Environmental Monitoring Research

### Call for Papers

Environmental monitoring is considered as the activities that collecting information of environmental quality, pollution level and its changes, the core objective of which is to provide data on the status and trends of environmental quality, to judge environmental quality and to serve environmental management. The process of environmental monitoring generally includes: on-site investigation and data collection, monitoring plan design, optimization of layout, sample collection, sample transportation and preservation, sample pretreatment, analysis and testing, data processing, comprehensive evaluation, etc. This special issue will be focused on studying different kinds of environmental monitoring technologies and their applications.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **environmental monitoring research**. Potential topics include, but are not limited to:

- Environmental monitoring technologies
- Pollution source monitoring
- Water and wastewater monitoring
- Air and waste gas monitoring
- Soil monitoring
- Solid waste monitoring
- Automatic monitoring system
- Remote sensing monitoring

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Environmental Monitoring Research**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	May 15th, 2019
Publication Date	July 2019

**Guest Editor:**

**Scientific Research**  
*Open Access*

**Journal of**  
**Environmental Protection**  
ISSN Online: 2152-2219
