

## Special Issue on Environmental Monitoring and Assessment

### Call for Papers

Environmental monitoring is the use of chemical, physical, biomedical, telemetry, remote sensing, computer and other modern scientific and technological means to monitor and measure various indicators to reflect environmental quality and its changing trends, so as to make a comprehensive evaluation of environmental quality. Environmental monitoring includes air quality monitoring, water quality monitoring and soil monitoring. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Environmental Monitoring and Assessment**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Environmental Monitoring and Assessment**. Potential topics include, but are not limited to:

- Air quality monitoring
- Soil monitoring
- Risk management
- Water quality monitoring
- Environmental quality
- Environmental monitoring sensors
- EA & EIA
- Environmental assessment tools
- Global environmental analysis
- Environmental impact design

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Environmental Monitoring and Assessment**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	June 22nd, 2020
Publication Date	August 2020
