

Special Issue on Environmental Chemistry and Pollution

Call for Papers

Environmental chemistry is a branch of chemistry that deals with the origins, transport, reactions, effects, and fates of chemical species in the water, air, earth, and living environments, as well as the influence of human activities. With the deepening of environmental chemistry research, it has laid a solid foundation for the development of environmental science and provided an important scientific basis for the treatment of environmental pollution. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Environmental Chemistry and Pollution**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Environmental Chemistry and Pollution**. Potential topics include, but are not limited to:

- Environmental analytical chemistry
- Organic and radioactive pollutants
- Green chemistry
- Soil and sediment chemistry
- Marine and freshwater chemistry
- Geochemistry and biogeochemistry
- Atmospheric chemistry in climate change
- Environmental pollution chemistry
- Pollution and remediation

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Environmental Chemistry and Pollution**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	February 16th, 2021
Publication Date	April 2021

Guest Editor:

Scientific Research
Open Access

**Journal of Environmental
Protection**

ISSN Online: 2152-2219
