

## Special Issue on Environmental Catalysis

### Call for Papers

The problem of environmental pollution is becoming more and more serious, and people also realize that the deterioration of the environment threatens the survival and development of mankind. Therefore, protecting the environment and eliminating pollution have become key tasks in the field of modern science and technology. Environmental catalysis is a catalytic technology used to reduce the emission of environmental incompatible materials, which plays an important role in solving environmental pollution problems. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Environmental Catalysis**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Environmental Catalysis**. Potential topics include, but are not limited to:

- Catalytic elimination of environmental pollutants
- Catalytic materials for application in water purification
- Catalytic recycling of waste
- Catalytic oxidation and reduction of gaseous pollutants
- Photocatalysis technology
- Indoor air catalytic purification technology
- Catalytic denitration of flue gas
- Environmental catalysis and pollution control

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Environmental Catalysis**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	August 2nd, 2021
Publication Date	October 2021

**Guest Editor:**

**Scientific Research**  
*Open Access*

**Journal of Environmental  
Protection**

ISSN Online: 2152-2219
